## LINKS

[Portfolio Website](#)

## SKILLS

SQL (Programming Language)

HyperText Markup Language (HTML)

Cascading Style Sheets (CSS)

Python (Programming Language)

JavaScript (Programming Language)

## HOBBIES

I enjoy working on my PC and upgrading components where necessary and testing different setups. I'm also a fitness enthusiast, I regularly engage in gym workouts to maintain a healthy and active lifestyle

## PROFILE

I am an aspiring web developer. I have recently completed a twelve-week intensive bootcamp in software development in hopes of putting myself in a good position to either get an entry level position or an apprenticeship. I would like to gain skills/experience and would value a position that allows for progression.

Quiz game – A JavaScript based multiple choice game to test users' knowledge. Primarily built using JavaScript

Portfolio Website – Personal website displaying all projects. Built using a combination of HTML and CSS.

## EMPLOYMENT HISTORY

---

Labourer, Hepburn Group

Sutton

May 2022 — Mar 2023

Working alongside tradesmen providing them with assistance in taking off and then replacing the cladding off a block of flats. As we were working on a residential building, tasks often had to be completed within certain time constraints and so effective time management and organisation amongst the team was pivotal. Since we were working at heights up to heights twenty-five floors high, teamwork and communication was a must to ensure the safety of everyone involved. Since we were working on a residential building, interactions with the public were a regular occurrence. It was important to converse with them respectfully and direct them to a higher-up if they had any concerns.

Labourer, Sheen Lane Developments,  
Coombe Hill House

Wimbledon

Jul 2021 — Feb 2022

Worked as a labourer performing tasks such as emptying skips, assisting tradesmen when needed, loading and unloading materials and equipment, operating hoist, general site cleaning. I could be called to perform a different task at any given time and so I was required to show adaptability. If a task presented some difficulty, then I would use critical thinking to see if there were any viable alternatives to complete it. If there was no safe way of performing the task, then I would aware the supervisor.
